

CONTENTS

List of contents	i
List of annexes	iii
Executive Summary	v
Acknowledgements	xxvi

Part I – Introduction

1	An overview of chemical warfare	2
2	Chemical warfare work at Porton	4
3	Chemical warfare compounds used in human studies 1939-1989	9
4	The direction and oversight of chemical warfare work at Porton Down	12

Part II – Volunteers

	Overview	22
5	Porton Down Volunteers	23
6	Human studies of the common cold and influenza	35
7	Chemical warfare training and the Defence NBC Centre	49

Part III – Human studies with nerve agents

	Overview	58
8	G agents 1945-1953	59
9	G agents 1954-1989	77
10	V agents	95

Part IV – Human studies with incapacitating agents

	Overview	110
11	Psychological incapacitating agents	111
12	Physical incapacitating agents	128
13	Suspension of human tests	138

Part V – Riot control agents

	Overview	144
14	The development of CS	146
15	Human studies with CR	174
16	Miscellaneous riot control studies	197

Part VI – Other human studies with chemical warfare agents

	Overview	208
17	World War II	209
18	Other chemical warfare agent studies after 1945	233

Part VII – Human studies with treatments

	Overview	244
19	Treatments for nerve agent poisoning	246
20	Skin Protection	279

Part VIII – Ethics

	Overview	304
21	Recruitment of Porton Down Volunteers	305
22	The Ethics of research on Humans in the United Kingdom 1939-1989 (Dr Alasdair Maclean)	351
23	An Ethical Assessment (Professor Sir Ian Kennedy)	403

ANNEXES

A	Non-chemical warfare human studies	435
B	Human studies with simulants	446
C	Cholinesterase measurements	453
D	Comparisons of measurements of vapour exposures	454
E	Medical criteria and performance testing	455
F	Candidate vesicants and irritant compounds tested during World War II	463
G	Patch Tests	468
H	Recollections of volunteers	469
I	The 1965 Volunteer recruitment film	495
J	Instances of refusals recorded in experimental logs	499
K	Examples of the consent form, the lay statement and the compensation form, introduced into use in 1987	503
