| 27-11-2009-095102-001 | 29/12/2009 | Request relates to asbestos containing materials (ACM) found in metal lockers used by cleaners working in Warminster Garrison. During 2008 and to February 2008 cleaners in Warminster Garrison were storing cleaning equipment and materials in old Army metal lockers. Some of those lockers contained a plate at the bottom made from concrete/asbestos. In about February 2009 the lockers with concrete/asbestos plates were disposed of because some of the plates had been damaged and were releasing asbestos fibres into the air. My question is when was the first occasion that the cleaners using those lockers could have been exposed to asbestos fibres. |
