

## **Launch of JSP 520 Issue 3 – UK MOD's OME Safety and Environmental Management**

JSP 520 Issue 3 supersedes Issue 2 dated June 2005 and will be formally issued on the **31<sup>st</sup> January 2011**.

JSP 520 has been completely reviewed and is presented in two Parts:

Part 1 – Policy

Part 2 – Guidance Leaflets including Approved Codes of Practice.

JSP 520 has been restructured to follow the component parts of an effective management system, drawing on JSP 815, HSE publication HS(G) 65 and ISO 14001 and addresses the 5 main elements expected of a management system, namely: Policy, Organisation and Arrangements, Planning and Implementation, Measuring Performance and Audit and Performance Review.

JSP 520 Part 2 has been restructured into Leaflets, grouped together under the 5 main elements of a management system.

DOSG Safety Management Office has provided several briefs with the aim of providing an overview of the new JSP 520 construct and details of significant changes.

A copy of the presentation is detailed on this web page.

JSP 520 Issue 3 is now available on this web page and can also be found on the Internet using the internet link

Or by typing "JSP 520" in the relevant search engine.

JSP 520 Issue 2 will be retained as an archive version and is available as a separate document on this web page.
